

Project1 Milestone2

Prototypes:

Pseudocode:

Basically, this is a to-do app part of the bigger plant-growing app.

As shown in the prototypes above,

In the first screen, there will be two tab bars allowing the user coming back and forth between the GOAL and TO-DO screens. The activities icons will be displayed in collection view.

When tapping one of the icons, the user will go to the second screen, which lets the user adds an activity to the to-do list. There will be a picker view letting the user choose the specific time and a textfield for defining the user's own activities. Once hit Save, this activity will appear on the To-Do List view and accompanies with a check box.
